

# State of the Organization

Resource Central’s goal is to make conservation easy so that community members can collectively make an impact to save water, reduce waste, and conserve energy.

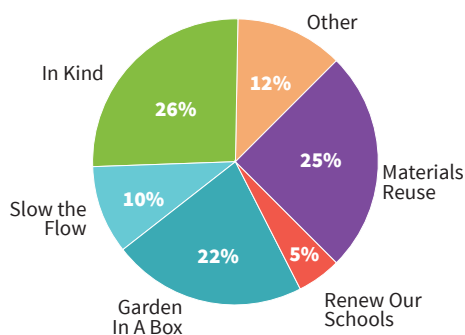

In the last year we expanded our water programs, adding nine new communities to our list of partners, and engaged over 70,000 people from Fort Collins to Castle Rock, from Greeley to Aspen and in between. We expanded our school energy program, Renew Our Schools, to help schools across the nation reduce carbon emissions. We’re also planning big improvements to make our Materials Reuse program achieve even more waste diversion and serve as a national zero waste model that our community can take pride in. See the infographic on the back for more details.

**Thank you** to everyone who participated in one of our conservation programs this year. Whether you donated or repurposed something from our Materials Reuse store, planted a low-water Garden In A Box, removed turf grass, upgraded a toilet, or honed your outdoor watering through a free Slow the Flow sprinkler inspection—**YOU are part of the solution** that will help us to restore a healthy balance to our planet.

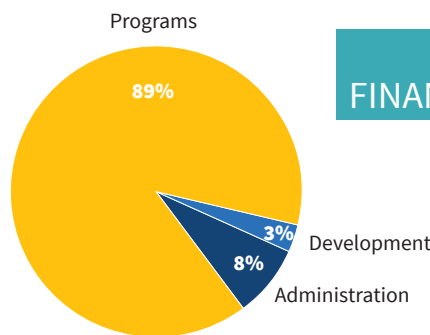

Resource Central is achieving **more impact than ever before** in response to the urgent needs facing our environment. Please join us by taking action, spreading the word to your friends and neighbors about our programs, and supporting us financially so we can continue to respond to the needs of community members to make conservation actions easy for all.

# BY THE NUMBERS

Resource Central's impact  
in 2018 and beyond

## Saved Water

**261,000,000**

gallons of water saved  
*a 15% increase from previous year!*

———— All Programs ————

**5,488**

water-wise gardens distributed

———— Garden In A Box ————

**704**

inefficient toilets upgraded

———— Flush for the Future ————

**922**

participants educated on xeriscaping

———— Water-Wise Seminars ————

## Overall Impact

**70,000**

people taking conservation action  
to protect our climate

**40**

city, county, and program  
partners engaged

## Reduced Waste

**3,850,000**

pounds of building  
materials reused

———— Materials Reuse ————

## Conserved Energy

**21,366**

students reduced energy  
use in schools

———— Renew Our Schools ————
