CONSERVATION MADE EASY

# SLOW THE FLOW SPRINKLER EFFICIENCY CONSULTATIONS

## HOA/COMMERCIAL INFORMATION

# SAVE WATER AND MONEY!

## ► What We Do

Slow the Flow offers a quick and impactful way to evaluate the irrigation practices of your HOA or commercial property and makes simple suggestions for changes that will reduce waste and runoff. Slow the Flow's trained technicians perform a detailed analysis of your sprinkler system and will provide a comprehensive report detailing findings and recommendations to improve efficiency.

The service will provide suggestions that will deliver measurable improvements in water use reduction, saving your HOA or commercial property money, and supporting community conservation goals. This no-cost service is available through partnerships with more than two dozen water utilities across Colorado's Front Range.

## ► What You'll Get

- A visual inspection to check for problems that waste water.
- Efficiency tests to see how evenly and quickly your sprinklers are distributing water.
- A detailed report providing an overview of all findings and recommendations to improve the efficiency of the sprinkler system.
- A customized watering schedule that could help **save thousands of gallons of water per year.**

## ► Is This The Right Service For You?

**Please review the following information to verify you understand and can meet all the requirements.**

1. You are requesting this service for a property encompassing multiple homes and/or public spaces, a business, or a non-residential property.
2. The property has an in-ground sprinkler system that is operated by one or more control clocks.
3. The sprinkler system is currently on for the season (or will be turned on before the scheduled appointment) and has no significant leaks or issues.
4. The property has some grass (not just plants, shrubs, or a garden) that is watered by the sprinkler system.
5. A property representative must meet with the technician(s) before and after the consultation.
6. The consultation may interrupt the regularly scheduled watering programs.
7. No work or maintenance can be done on the system during the consultation that affects the performance of the system.
8. No activity can occur during the consultation that affects our technicians' ability to perform tests (no mowing, surveying, pesticide application, painting, or events).

# Steps To A Consultation

## Before The Consultation

1. You complete the online application.
2. You sign the liability waiver.
3. A Resource Central representative will contact you to discuss scheduling.
4. You verify no work or maintenance will be done on the system during the consultation that affects the performance of the system.
5. You verify no activity will occur during the consultation that affects our technicians' ability to perform tests (no mowing, surveying, pesticide application, painting, or events).
6. You verify we have correct contact information for at least one property representative who will be available for calls during the consultation.

## During The Consultation

1. A property representative will meet with the technician(s) at the designated meeting place (this typically takes between 1/2 hour to 2 hours depending on the size of the property). Keep the following in mind for this meeting:
  - The technician(s) must be given access/keys to the control clocks for the entire consultation.
  - A site map is helpful to bring (but not required) to give the technician(s) a visual aid as to where the clocks and zones are located.
  - Show/tell the technician(s) any pertinent information about the property such as clock locations or problem areas.
2. The technician(s) will perform the consultation.
  - Consultations typically last between 4 hours to a week, depending on the size of the property. We will let you know at the time of scheduling how long Resource Central technicians will be on site.
3. A property representative will meet with the technician(s) on site immediately following the completion of testing to receive a **post-consultation debrief** of the results (this can last up to an hour).

## After The Consultation

1. We will compile the data, complete a written report with our findings, and send the written report to you within 2 weeks.
