

HELPING COMMUNITIES SAVE WATER

Is your homeowners association (HOA) ready to transform unused grass into a drought-tolerant landscape? Take a leap with an **HOA Turf Conversion Consultation!** Our partner, **Resource Central**, will provide the help you need to start and finish a turf replacement project. The program includes **expert hands-on support**, with regular check-ins, troubleshooting, and an information packet full of resources.

This program is **free to a limited number of HOAs**. Those who successfully complete projects will receive a grant to put toward the project cost!

Community Benefits

- Reduce water use by replacing traditional turf grass with drought-tolerant plants.
- Elevate your neighborhood appeal with a colorful and beautiful waterwise landscape.
- Bring more bees, butterflies, and birds to your community with pollinator-friendly plants.
